2004 to 2005 Labourer for Building Contractor S Robson

Working on a number of different projects and helping in all areas of building and construction

Interests

Kickboxing, Boxing, Gym, Playing Guitar/Singer,

Hobbies and interests

My name is Chris Oates I came straight out of university working for lesingemedia for 7 months. I studied at The University of Hertfordshire for a BA Hounrs Degree in 3D Digital Animation. The first 2 years at University have taught me how to produce characters, modelling characters animation and all the techniques of the many software packages that are available. With this course you need a vast amount of hardware so I have made my own render farms so I'm able to render all my work more effectively. I have 2 render boxes, and a very fast PC which I have linked together to produce my second year final Film which is a music based video of a song by called Falling by "Thank You Anyway" The main characters are the singer and his girl friend. During my first 2 years I have produced some commercial work for 2 companies, creating an everyday object in 3D for a Company called Nonsense I animated and designed a claw hammer which when viewed from an odd angle, disguised its identity, this was to be an internet game for clients to name the object.

I also worked for a Design Consultant his brief was to take the orthographic drawings for an 8 bedroom Castle and produce a 3D digital model layout that his client could view from all angles and visualise all the interior and exterior designs. This project is ongoing.

My hobbies are kick boxing going to the gym and American football but due to the amount of work I have had to do in the second year I was unable to continue with the American football.

Before University I was a singer song writer and lead Guitarist in a 4 peace band with my younger brother and our 2 best friends. We won several talent competitions and are very popular in our local Town of Stowmarket our audience attracting 600 people to a local snooker club in aid of a charity event to raise funds for a local family who's Son and a much loved friend died in a tragic accident we raised £1400.00 that evening.

I think Whilst I am still quite young I have experienced a lot of life skills and maturity beyond my age to help me with most challenges in life, I am a hard worker reliable honest and I'm a very inventive and creative person, I believe I would be a great asset to any company that employed me.
